Remote QA Engineer (m/f/d)

You want to work as a remote QA Engineer with the prospect of coming to Portugal after a successful freelance cooperation?

We are a boutique consultancy in the heart of Munich with a focus on business IT & ERP systems. Our customers are fast-growing, international start-ups and medium-sized companies. We are ambitious, team-oriented and passionate about our work.

We are looking for a dedicated full time team member to support our international Team.

Your tasks

- Develop, manage and maintain all necessary QA processes and standards for the delivery of our live projects
- Define test plans, build automated test and incorporate them into the software engineering process
- Identify, replicate, analyse, and document bugs and issues
- Collaborate with our development team and help them to keep high code quality standards

Your profile

- Proven experience regarding quality assurance
- Experience in writing automated tests and a variety of different testing techniques
- Strong knowledge of software QA methodologies, tools, and processes
- Familiarity with **Python**, JavaScript and/or similar programming languages
- Passion for quality assurance and strong attention to details

Our offer

- The chance to come to Portugal after a successful freelance cooperation
- Inclusion in our motivated & high-performing international team through daily meetings
- English communication via Slack and online meetings to be connected despite different time zones and locations
- Above-average remuneration
